- Reduces patient anxiety
- Increases exam productivity
- Quick & easy installation
- Ease of control and presets
- Elevates patient satisfaction

PERFECT SKY

The Perfect Sky LED Luminaire combines 360 degrees of RGB LED lighting for patient color selection of their clinical space, while incorporating an LED backlit Sky Image Ceiling. The Perfect Sky is designed for non-MR applications and can easily be installed in ACT type drop or gypsum ceilings. The Perfect Sky helps relax, distract and brings the healing power of nature into any clinical environment. This can help reduce stress for patients and clinicians, increasing patient satisfaction scores and referral rates. The Perfect Sky can transform any waiting area, hallway, mammography, imaging and/or oncology suite to create a patient experience that won't disappoint!

Choose a color to soften the space, relax, distract and heal in any space with the Perfect Sky experience!
