

"They aren't thinking about going in the tube, they are thinking about...the color, video and music. They like all of those different options."

- Rachel, MRI Tech

MR-SAFE WIRELESS PORTABLE VIDEO DISPLAY

- Wireless – No cables on floor
- Payback in less than 12 months
- 13 hours of use between recharge
- Quick & easy installation
- Proven to reduce sedation/anesthesia
- Improves patient comfort
- Creates a calming environment
- In-bore viewing 4K nature videos & movies
- Minimizes patient motion
- Tested to meet all MR requirements
- Improves workflow
- Increases patient satisfaction

The **PDC Wireless Portable Video Display (WPVD)** brings you all of the benefits of our PVD. With quick and easy installation, return to scanning in minutes and begin achieving benefits of reduced sedation, anesthesia, improved patient experience - and a payback period in as little as 12 months.

Thirteen hours of use between recharge helps eliminate the need to charge during scheduled scanning times. The **WPVD** patient experience virtually makes the bore disappear and is specifically designed to allow in-bore viewing regardless of patient orientation. For head-first patients, Mirror Glasses or a Head Coil Mirror is utilized. For feet-first imaging, GE Healthcare's Comfort Tilt Technology or a pillow may be all you need! The **WPVD** seamlessly integrates with PDC's Caring MR Suite® and is tested to meet all MR requirements.
