PERFECT SKY

The Perfect Sky LED Luminaire offers 360 degrees of RGB lighting combined with an LED backlit sky image. The Perfect Sky is designed for non-MRI spaces and can install easily within an ACT drop or gypsum ceiling.

The Perfect Sky helps relax and distract patients while bringing the healing power of nature into the clinical environment. This helps reduce stress for patients AND clinicians while increasing patient satisfaction scores and referral rates. The Perfect Sky can transform any waiting area, hallway, mammography, ultrasound, CT and/or oncology suite to create a soothing and memorable patient experience.

In a Caring Mammo Suite, a patient selected color illuminates the space, while one of PDC's 18 custom dynamic nature themes offers the patient positive distraction during their exam.
