

TECH PORTAL + SOUND CONTROL, P3

- **FOR ADDITIONAL VOLUME CONTROLS** tap “Audio Mixer” at top of Sound Control
- **AUDIO MIXER:** Adjust volume below Master Volume Level, & unlink from, or link audio outputs to Master Volume. Any audio outputs linked to the Master will then be controlled by the Master Volume in other areas of the app too
- **TO LINK TO/UNLINK FROM MASTER VOLUME:** Below the desired Audio Output, tap the link icon at left to link to or unlink from the Master Volume. Unlinking from the Master Volume will allow you to control each output’s volume independently
- **CARING SUITE AUDIO OUTPUT:** Audio will play through suite speakers & can be integrated with compatible headphone systems. To integrate compatible headphones, see P3
