

## AUDIO CONTROL

- **AUDIO OPTIONS:** Options include "Themes": Soothing music paired with Theme videos and "My Device" which offers the option to plug in a headphone-jack compatible music-playing device
- **TO SELECT AUDIO** tap on the blue bar at bottom far left of App. The option currently selected will be named on the blue bar. To change audio, tap the blue bar, & tap to select desired audio source. If "My Device" does not appear as an option, follow the My Device steps below first
- **MY DEVICE:** Plug a compatible music-playing device into the provided headphone jack. Use the provided white adapters for compatible devices without headphone jacks. Select music, ensure it is playing & turn volume up. Tap the blue Audio bar at bottom left & select "My Device." See P15 for more

## PDC Audio Video Box (AVB)

- **AVB POWER:** For system power, ensure a green light is illuminated to right of "Power" at center, as above. If it is not, press the gray button above "Power"
- **COMPUTER POWER:** For system power, ensure blue power button is illuminated in the cut-out box at right. If not, press button once to power on computer
- **SYSTEM UPDATES:** If required, the ports to left of the computer power button are used for supplied updates
- **MY DEVICE CABLE** is plugged into the "Line in" port on the back of the box. When using My Device, a green light should appear to the right of "Line" on the front of box. If not illuminated, press the gray button above "Line." See P9 for more on My Device
- **FOR THEME MUSIC**, a green light should appear to the right of "HDMI." If not, press the gray button above "HDMI"
