

# Caring MR Suite® Experience

## Your best patient experience - Now better than ever

### Frequently Asked Questions

#### What is the Caring MR Suite®?

The Caring MR Suite® is an MRI suite designed expressly to reduce claustrophobia and sedation, improve MRI patient experience and improve workflow. With a tap of a finger, patients and caregivers can instantly personalize the suite's Nature Theme video or movie, lighting hue and music to help patients feel more relaxed and in control.

#### Who is the Caring MR Suite® for?

The Caring MR Suite® is for all MRI patients; however, the suite has been shown to specifically help patients who experience anxiety and claustrophobia with MRI. Several Caring MR Suite® sites have reported that patients who have not been able to tolerate a standard MRI suite, have had a successful scan with the Caring MR Suite®.

#### How does the Caring MR Suite® help patients relax?

The following features play a large role in the Caring MR Suite's® ability to calm patients:

1. **Control** - to ease anxiety
2. **Personalization** - to fit moods and preferences
3. **Nature imagery** - to calm and help patients heal more quickly, with less medication
4. **Choice** - to enhance positive sensory absorption

PDC's Caring MR Suite® distracts the patient while giving them a sense of control, creating a patient experience one won't forget!

# Frequently Asked Questions Continued...

## What makes the Caring MR Suite® different?

The Caring MR Suite® is the first MRI suite to be able to offer a Ceiling Video Display and the power to truly personalize the suite's video, lighting and music. The Caring MR Suite® is also one of the first MRI suites to offer an MRI in-bore viewing solution. [Learn more with 8 Ways to the Best MRI Experience.](#)

## What are the benefits of the Caring MR Suite®?

Caring MR Suite® users report improved patient experience and less need for sedation, less failed scans and less patient movement during a scan, and even patient motion is no small matter. This study finds the potential cost of patient motion to be \$115,000 per scanner per year. Survey Results indicate 94% of patients report an "Excellent" experience. Furthermore, 100% of patients who report high MRI anxiety would "Highly Recommend" the Caring MR Suite® experience. See 8 Ways to the Best MRI Experience to learn more, and here, learn how one team put their Caring MR Suite to work to reduce anesthesia cases by nearly 60% and produce a payback period of less than 2 years.

## Will patients be able to watch the Nature Theme video during their scan?

With our Portable Video Display for MRI in-bore viewing or with procedures where the patient's head is outside the bore, patients will be able to watch the Nature Theme video for the entirety of the scan.

## What do the Nature Themes consist of?

Nature Themes feature original 4K and HD nature video created specifically to improve patient experience. Themes are paired with soothing music and a lighting hue that can be easily personalized. Visit our Themes page to preview Theme videos and Image Ceiling Themes. Patients can request a music style or bring in music on a compatible smart phone, MP3 player or CD.
