PDC's Caring Mammography Suite is designed for non-MR spaces and can install easily within an ACT drop or gypsum ceiling in new and existing rooms.

The Perfect Sky LED Luminaire offers 360s of RGB lighting combined with an LED backlit Sky Image.

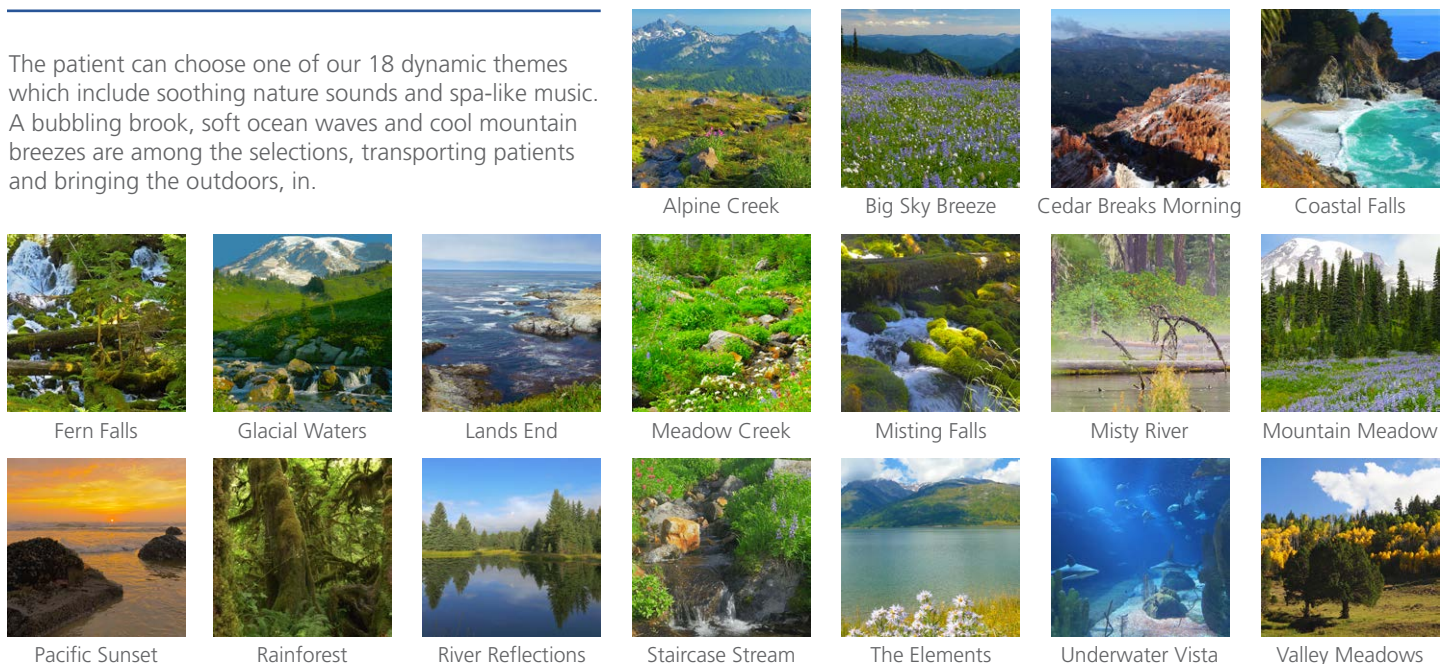

Using an interactive tablet, a patient selected color illuminates the space while one of PDC's custom nature themes offers the patient positive distraction during their exam.

In a Caring Mammo Suite, a patient selected color illuminates the space, while one of PDC's 18 custom dynamic nature themes offers the patient positive distraction during their exam.

## Caring Mammo Suite Themes

The patient can choose one of our 18 dynamic themes which include soothing nature sounds and spa-like music. A bubbling brook, soft ocean waves and cool mountain breezes are among the selections, transporting patients and bringing the outdoors, in.

## Perfect Sky Gallery

A customized image can be incorporated at an additional cost. Ask for details!
