

NEW!

MRI WIRELESS IN-BORE VIEWING

CAMERA + PROJECTION SYSTEM

Projection allows patients to view video of choice.

Camera sends live feed of patient, head to toe, back to the Technologist desk.

IMPROVING THE MRI EXPERIENCE

- MRI-safe
- Lightweight (7 lb), portable & easy to install
- Head-first and feet-first scanning
- Compatible with head coil
- Zero artifacts
- No glasses, goggles or cleaning
- No motion sickness
- No construction, no cables, completely wireless
- Calms patient anxiety & claustrophobia
- Reduces sedation & anesthesia
- Improves safety - provides live video of the patient in the bore
- ROI of less than 30 days
 - Reduced repeat scans
 - Increased throughput
 - Decreased escapes

DEMO DETAILS ON BACK

REMOVABLE PROJECTOR SCREEN - used for feet-first imaging when patients' head is outside the bore

- Projector Screen snaps on and off in seconds
- Projector Screen accessory is only required if patient's head is outside the bore

System does not interfere with head coil, shown without Projector Screen
